📍 Ahmedabad, Gujarat, India

Professional Summary

Full Stack Developer with 1.5+ years of hands-on experience building scalable enterprise platforms. Specialized in backend architecture (Node.js, Laravel) and full-stack marketplace solutions handling 100K+ users. Proven ability to design databases, develop REST APIs, and lead cross-functional projects from requirement analysis to production deployment.

Professional Experience

Full Stack Developer

House of Cre8r Pvt. Ltd., Ahmedabad, Gujarat

📅 July 2025 - Present

Architecting and developing enterprise-grade web and mobile applications. Leading full SDLC from requirements gathering to production support for multi-vendor platforms.

- **Backend Architecture:** Built scalable REST APIs using Node.js & Express, handling 10K+ daily requests with optimized MySQL queries (reduced response time by 40%)
- **Database Design:** Designed normalized relational schemas for marketplace systems supporting multi-vendor inventory, orders, and bookings
- **Mobile Development:** Developed React Native applications for iOS & Android with Firebase authentication and real-time notifications
- **Third-Party Integrations:** Integrated Razorpay, Firebase Cloud Messaging, OTPless, and custom payment workflows
- **Frontend Development:** Built responsive web interfaces using React 18, Next.js 14, and Tailwind CSS with TypeScript
- **Production Support:** Maintained 99.5% uptime, debugged production issues, and optimized application performance

Projects I Worked On

TransRentals - Vehicle & Equipment Rental Platform

Full Stack Developer | Laravel, PHP, MySQL, React Native, Firebase | 50K+ Active Users

Built comprehensive B2B2C rental platform connecting customers with 1000+ vendors across India. Handled complete backend APIs, vendor workflows, mobile experiences, and payment integration.

- Developed 40+ REST APIs for customer/vendor authentication, booking lifecycle, quotations, and real-time notifications
- Architected vendor approval workflow with document verification, reducing onboarding time by 60%
- Built booking management system handling 5 vehicle types with status tracking, pricing, and cancellation policies
- Implemented review & rating system with category-wise feedback and booking premium multipliers
- Integrated Firebase Cloud Messaging delivering real-time alerts to 100K+ devices
- Optimized MySQL database reducing API response time from 800ms to 200ms through indexing & query optimization

Ecommarkt - Multi-Vendor E-Commerce & Service Marketplace

Full Stack Developer | Node.js, React, Next.js, Prisma ORM, MySQL | 200K+ Users, 5000+ Sellers

Led end-to-end development of comprehensive marketplace platform with separate web and mobile applications for customers and shop owners.

- Architected backend using Node.js with role-based access control for Admin, Shop Owner, and Customer roles
- Designed 40+ database models in Prisma ORM supporting product catalog, inventory, orders, services, and subscriptions
- Developed product & service management modules supporting 5000+ active sellers with bulk operations
- Built subscription system (MICRO/MINI/STANDARD/PRO tiers) generating \$50K+ monthly recurring revenue
- Implemented service booking & appointment scheduling with real-time availability and calendar integration
- Created customer dashboards with analytics, order tracking, and personalized recommendations

- Integrated Firebase Authentication and Razorpay payment gateway processing 10K+ monthly transactions
 - Developed advanced search filters and recommendation engine improving conversion by 35%
-

Bajrangdas Furniture Management System

Full Stack Developer (BCA Capstone) | Python, MySQL, Bootstrap | Grade: 95/100

Designed and developed complete inventory and order management system as final-year capstone project.

- Developed role-based authentication (Admin, Manager, Customer) with session management
- Built product catalog with category management supporting 500+ furniture SKUs
- Implemented shopping cart, checkout, and order tracking with PDF invoice generation
- Created supplier management module with purchase orders and inventory reconciliation
- Designed responsive UI using Bootstrap with mobile-first approach

Technical Skills

- Skilled in backend development using Laravel 11, with experience in role-based authentication, REST APIs, admin dashboards, and modular architecture.
- Proficient in full-stack development using Laravel, JavaScript, MySQL, and Blade templating for dynamic, scalable web applications.
- Experienced in building responsive UIs with HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, and Laravel Blade.
- Developed cross-platform Android applications using React Native with real-time booking, user authentication, and intuitive mobile interfaces.
- Experienced with React 18, Next.js 14, TypeScript, Node.js, Prisma ORM, and MySQL through full-stack marketplace platform development.
- Proficient in mobile app development using React Native for building performant, cross-platform applications with native-like user experiences.
- Advanced knowledge of Next.js 14 for server-side rendering, static generation, and building scalable modern web applications.
- Integrated OTP-based login systems using Firebase and OTPless, and managed payment workflows with Razorpay and manual gateways.
- Experienced with Claude AI and prompt engineering to automate development tasks, improve code quality, and accelerate project delivery through intelligent automation.

- Skilled in prompt engineering for maximizing AI tool effectiveness in code generation, logic planning, debugging, and documentation.
- Skilled in SEO strategies, including on-page optimization, Rank Math, keyword research, structured data, and dynamic meta tags.
- Familiar with using ChatGPT, Claude AI, and other AI tools to streamline code writing, logic planning, and project development.
- Experience with content writing, blogging, and basic digital marketing for improving project reach and branding.

Education

BCA - BACHELOR OF COMPUTER APPLICATIONS

SOM-LALIT INSTITUTE OF COMPUTER APPLICATION (GUJARATUNIVERSITY)

 02/22 - 04/24 — AHMEDABAD
